**AIR FORCE ENLISTED
CLASSIFICATION DIRECTORY
(AFECD)**

The Official Guide to the
Air Force
Enlisted Classification Codes

*A Specialty for Every Air Force Job
And
The Qualifications Necessary to Perform Each Job*

This Guide establishes the occupational structure of the Air Force enlisted force. The occupational structure is flexible to permit enlisted personnel to specialize and develop their skills and abilities while allowing the Air Force to meet changing mission requirements. Individual enlisted personnel have a joint responsibility with commanders and supervisors at all levels to fully develop their abilities consistent with Air Force needs and within the established patterns of specialization. This directory is written primarily for use by personnel officials (officers and senior noncommissioned officers) and agencies engaged in procurement, classification, and training of Air Force members. It implements Air Force Policy Directive (AFPD) 36-21, *Utilization and Classification of Air Force Military Personnel*. Refer to AFI 36-2101, *Classifying Military Personnel (Officer and Enlisted)*, for military classification tenets and base level procedures. Maintain and dispose of records created as a result of prescribed processes in accordance with the Records Disposition Schedule (RDS) accessed from the web-based [Records Information Management System](#). RELEASABILITY: There are no releasability restrictions on this publication.

SUMMARY OF REVISIONS

This is the official directory for all military enlisted classification descriptions, codes, and identifiers. Updates to this directory are according to the Air Force Career Field Managers' Guide available at the [myPers web site](#). This update contains all changes that have been approved and scheduled for implementation on 30 April 2020 and provides a Change Summary and Conversion Instruction Guide (CS&CIG) or Change Summary Guides (CSG), as necessary. Each CS&CIG will include a summary of each change, conversion instructions for all AFSC changes, mergers, additions, realignments, and deletions of classification identifiers, and appropriate page changes to the directory. Subsequent Change Summary Guides along with the description changes will be identified by the effective date and as an appendix to the CS&CIG for that particular conversion cycle. Additionally, minor changes and corrections throughout the publication include correcting spelling or editing errors. When a () precedes the specialty description or title, it denotes a major or significant revision from the previous edition – the reader must read the particular section of the publication in its entirety to determine the extent of the changed material.

1. Using This Directory:

1.1. This directory contains a Change Summary and Conversion Instruction Guide (CS&CIG) for each update to the classification system, a Quick-Reference Guide, the Enlisted Classification Structure Chart to depict career progression through the specialties, Authorized Prefixes, Reporting Identifiers, Special Duty Identifiers, Air Force Specialty (AFS) descriptions, their assigned Air Force Specialty Codes (AFSC), Additional Mandatory Requirements for AFSC Entry, Special Experience Identifiers, and Chief Enlisted Manager (CEM) codes used in the enlisted classification system. Use the specialty descriptions and codes to identify different types of Air Force jobs and the qualifications of enlisted personnel to fill these jobs. Individual specialty descriptions and other attachments to this manual provide the occupational standards required or desired for successful performance in an AFS. Use these standards to procure, classify, and employ enlisted personnel; to develop career programs for initial training, retraining, and skill upgrade; and to structure unit manpower document (UMD) positions.

1.2. Attachment 4, **Additional Mandatory Requirements for AFSC Entry**, contains a consolidated listing by AFSC of mandatory requirements and restrictions for AFSC entry or retraining. This listing includes AFSCs not open to non-United States citizens, AFSCs authorized for use without shredouts, combat-related AFSCs not open to enlisted women, minimum physical profiles, and strength and mental aptitude scores for AFSC entry or retraining.

1.3. **AFI 36-2101, *Classifying Military Personnel (Officer and Enlisted)***, contains the procedural guidance for awarding and withdrawing classification codes, and tables that show the grade spread to skill-level relationship used in authorizing UMD positions. For procedural system guidance, refer to the Active Duty Personnel Services Delivery (PSD) Guide – *Personnel Employment (Classification)*, the Active Duty Personnel Services Delivery (PSD) Guide – *Special Experience Identifier (SEI) Process*, and the Personnel Services Delivery (PSD) Guide – *Air Force Specialty Code (AFSC) Conversion*, for personnel; and AFI 38-201, *Determining Manpower Requirements*, for manpower.

SPECIAL WARFARE ENABLER CAREER FIELD (1T)**Introduction
(Changed 31 Oct 19)**

The Special Warfare Enabler career field specialties within Special Warfare integrate with and accompany Special Warfare Career Field members (1Z) and teams to enable additional capabilities required for global access, precision strike, personnel recovery, command and control, and other multi-domain missions.

Special Warfare Enablers are employed across the spectrum of conflict to extend Air Force air power and enhance its lethality. They operate within the joint and combined force to build partnerships, develop asymmetric advantages and engage the enemy inside its own region. They provide the connective tissue required to bind multiple domains; focusing the integration of air, space, cyber and land issues through the lens of airpower from the ground up and delivering distinctive capability and expertise in any operating environment with unequaled lethality, accuracy, responsiveness, flexibility and persistence.

Special Warfare Enabler airmen may be employed alone or as part of a Special Warfare, Air Force, joint, interagency, or coalition force in support of Combatant Commander's objectives. They are capable of rapid deployment during day or night, to any environment, including permissive, hostile, denied, or politically and/or diplomatically sensitive locales. They operate in all six geographic disciplines: mountain, desert, arctic, urban, jungle, and water. They may operate under austere conditions for extended periods.

SPECIAL WARFARE CAREER FIELD (1Z)**Introduction**
(Established 31 Oct 19)

The specialties included in the Special Warfare Career Field form the Air Force's premier ground maneuver element. The Airmen of Special Warfare are employed across the spectrum of conflict to extend Air Force air power and enhance its lethality. They operate within the Joint and Combined Force to build partnerships, develop asymmetric advantages and engage the enemy inside its own region. They provide the connective tissue required to bind multiple domains; focusing the integration of air, space, cyber and land issues through the lens of airpower from the ground up and delivering distinctive capability and expertise in any operating environment with unequaled lethality, accuracy, responsiveness, flexibility and persistence. This career field includes the functions and activities of global access, precision strike and personnel recovery.

Global access includes special operations designed to prepare the environment and establish physical or cyber access to forward battlespaces for intelligence, surveillance and reconnaissance (ISR), forward air lodgment, proxy development, air infrastructural development, target development, and asymmetric effects to accomplish the supported commander's tactical, operational and strategic goals.

Precision strike encompasses terminal attack control, managing a variety of non-kinetic effects as well as kinetic fires from land, maritime and air based platforms to achieve the supported commander's desired battlefield effects.

Personnel Recovery involves all efforts designed to recover and reintegrate any designated individuals who become isolated from friendly control. A significant subset of PR is performing the same actions for sensitive equipment that could be harmful to the United States, or our Allies should it fall in the wrong hands.

Special Warfare airmen may be employed alone or as part of a Special Warfare, Air Force, joint, interagency, or coalition force in support of Combatant Commander's objectives. They are capable of rapid deployment during day or night, to any environment, including permissive, hostile, denied, or politically and/or diplomatically sensitive locales. They operate in all six geographic disciplines: mountain, desert, arctic, urban, jungle and water. The career field may operate under austere conditions for extended periods.

Introduction

The Air Advisor function involves specially trained Airmen utilizing their primary Air Force functional subject matter expertise to assess, train, advise, assist, and when authorized equip (ATAAE) foreign partner forces to develop their own internal aviation capacity and capability. In this functional category qualified conventional force airmen are Air Advisors trained and educated through USAF educations and training programs and standards; Combat Aviation Advisors are special operations airmen trained through Air Force Special Operations Command training programs certified through United States Special Operations Command (USSOCOM) standards. Missions conducted by Airmen in this functional category include Security Force Assistance (SFA) as part of broader U.S. security cooperation initiatives to organize, train, re-build/build, equip, and assist (OTERA) foreign security forces to develop their own capabilities. Missions take place across the range of military operations in both permissive and contested environments, under steady-state or surge conditions, and under politically sensitive environments where an overt U.S. presence is unacceptable to the host-nation government; environments where a limited, overt presence is acceptable, and under conditions where a large-scale U.S. presence is considered necessary and acceptable. In addition to mastery and qualification in their primary AFSC, education, training, and experience in this functional category, Air Advisor missions require knowledge and skills in individual and collective force protection; language, regional, cultural expertise; foreign disclosure requirements, authorities, polices, and funding unique to security cooperation and other operations including but not limited to foreign internal defense, COIN, and unconventional warfare; conduct of assessments of host nation SFA needs; baseline cultural and language skills in furtherance of SFA objectives; methods for mission assessment, measurement, and evaluation; knowledge and awareness of international law and governance, and attributes required to work in challenging cross-cultural settings often under arduous conditions while working with indigenous forces to safely and effectively employ their aviation capabilities in support of combatant commander campaign plan objectives.

SECTION III

SPECIAL EXPERIENCE IDENTIFIERS

Introduction (Changed 31 Oct 20)

1. Special Experience Identifiers (SEI). The SEIs in this attachment identify special experience and training not otherwise identified within the military personnel data system (MilPDS). SEIs complement the assignment process but are not substitutes for AFSCs, CEM codes, prefixes, suffixes, SDIs, RIs, personnel processing codes, and professional specialty course codes. They are established when identifying experience or training is critical to the job and person assignment match, and no other identification is appropriate or available. SEIs permit rapid identification of a resource already experienced to meet unique circumstances, contingency requirements, or management needs. They provide a means to track individuals and identify positions requiring or providing unique experience or training that otherwise would be lost. SEIs may be used to better distribute personnel and optimize the job and person match insofar as possible.

2. Authorized AFSCs. Normally, AFSCs and CEM codes listed as authorized for use with SEIs refer to the basic AFSC plus all shreds. All authorized skill levels of the basic AFSC are listed, including 9-skill levels and CEMs. If an AFSC is listed with the first 5 digits and an "X" in the 6th position, i.e.: 3P051X, then the SEI is authorized for use with the basic AFSC and all suffixes authorized with that AFSC. If an "X" is used in the skill level position it means that all skill levels are authorized for use with the SEI.

3. SEI Structure. The SEI code is composed of three numeric characters or three alphanumeric characters. Individual characters within the codes have no specific meaning. Most SEIs are authorized for award with specific AFSCs; some are authorized with any AFSC.

4. Establishing SEIs. Requests to establish, delete, or revise SEIs must be submitted according to the instructions provided in the Air Force Career Field Managers' Guide available at the [myPers web site](#).

5. SEI Fields in the MilPDS. SEIs that may be concurrently recorded in an airman record are currently set to five with the primary AFSC, five with the 2AFSC, four with the 3AFSC, three with the 4AFSC, and one in the general SEI area. Computer edits ensure the AFSC-SEI combinations are valid. The general area is used for SEIs authorized with any AFSC. A general SEI is used as a marker in the Personnel system to show a specific type of training or experience available to any Airman. This experience is not limited by AFSC. CAFSC SEI is not used by base level to award a SEI to the member. CAFSC SEI reflects an SEI code attached to the position the member is assigned and will reflect as the CAFSC SEI as a suspense indicator. If the member is not expected to gain the experience required to be awarded the SEI designated to the position, they should be removed from that position.

6. MilPDS-Generated SEI Award Notification (Personnel Services Delivery Guide - Special Experience Identifier (SEI) Process.) The CAFSC is designated with the SEI when an enlisted airman is assigned to a unit manpower document (UMD) position identified with the SEI. For SEIs designated as auto-notify, once experience and training requirements have been satisfied a MilPDS suspense notification will be provided as a reminder to award the SEI. Award suspense is performed for numeric SEIs only. For SEIs designated as auto-award, once experience and training requirements have been satisfied, MilPDS will award the SEI to the member. It will do so unless the member is removed from the SEI-coded position or the commander directs a change to the award suspense date prior to meeting the experience requirement.

ADDITIONAL MANDATORY REQUIREMENTS FOR AFSC ENTRY - ENLISTED (Changed 31 Oct 20)

Introduction

1. This attachment establishes minimum requirements for:

1.1. Aptitude:

1.1.1. Mechanical, administrative, general, or electronic (MAGE) aptitude scores derived from the Armed Forces Vocational Aptitude Battery or Armed Forces Classification Test. Certain Cyber-related AFSCs within the 1N & 3D career fields have alternate minimum cutoff scores based on the Air Force Entry-Level Cyber Test and/or the Air Force Electronic Data Processing Test (EDPT). Entrance into these AFSCs is permissible with the alternate minimum only if the individual achieves a score of 60 or higher on the Cyber Test. **The Cyber Test is only available for non-prior service applicants (the test is not available to prior service members or members applying for retraining).**

1.1.2. Strength aptitude codes are reflected in Column X and identify strength standards required for entry into each AFSC. Strength aptitude is defined in AFI 36-2101, *Classifying Military Personnel (Officer and Enlisted)* and testing procedures for retrainees are outlined in AFI 36-2626, *Airman Retraining Program*.

Code of E	Demonstrated by Weight Lift
F	Unknown
G	less than 40 lbs.
H	40 lbs.
J	50 lbs.
K	60 lbs.
L	70 lbs.
M	80 lbs.
N	90 lbs.
P	100 lbs.
	110 lbs.

1.2. Physical profile series factor (PULHES), as defined in AFI 48-123, *Medical Examination and Standards*.

1.3. Other AFSC entry requirements or restrictions:

1.3.1. Column M reflects AFSCs authorized for use without shredouts.

1.3.2. Column N reflects AFSCs not open to non-United States citizens. AFSCs identified in this column are open to United States nationals.

1.3.3. Column O reflects AFSCs closed for award to enlisted women or AFSCs with assignment restrictions for females. This AFSC is closed to females due to the direct ground combat nature of the duties IAW SECDEF Memo, 13 Jan 94, subject: Direct Ground Combat Definition and Assignment Rule.

1.4. Table Notes address dual aptitude scores, alternate Cyber Test scores, and suggest viewing of the specialty description for physical requirements.

Note	Explanation
1	Dual aptitude (or)
2	Dual aptitude (and)
3	See entry specialty description for physical requirements.
4	See Standard or Cyber-Test Based Alternate Aptitude Cutoff Table

2. Refer to paragraph 3 of individual specialty descriptions for additional AFSC entry requirements.

ATTACHMENT 5
CHIEF ENLISTED MANAGER (CEM) CODES
(Changed 31 October 2020)

Introduction

1. Description and General Duties. CEM codes contained in this attachment identify all chief master sergeant positions in the Enlisted Classification Structure. They also identify chief master sergeants that, through extensive experience and training, have demonstrated managerial ability to plan, direct, coordinate, implement, and control a wide range of work activity. Some managerial duties and responsibilities that are common to all chief enlisted managers are:

- 1.1. Manages and directs personnel resource activities; interprets and enforces policy and applicable directives.
- 1.2. Establishes control procedures to meet work goals and standards.
- 1.3. Recommends or initiates actions to improve functional operation efficiency.
- 1.4. Plans and programs work commitments and schedules.
- 1.5. Develops plans regarding facilities, supplies, and equipment procurement and maintenance.

2. CEM Composition and Concept. CEM codes in many cases are made up of a series of existing superintendent specialties where the degree of supervisory and managerial task involvement permits expanded resource use. As chief enlisted managers, chief master sergeants will be subject to working in a variety of similar jobs and functional areas where their general managerial and supervisory abilities can be most effectively used and challenged.

3. Award Criteria. CEM codes are awarded according to procedures outlined in AFI 36-2101. Basic requirements for awarding CEM codes are:

- 3.1. Be in the grade of chief master sergeant (or chief master sergeant selectee).
- 3.2. Possess qualification in a feeder specialty. The expanded duties and responsibilities, qualifications, and other specialty data for CEM codes are drawn from 9 level “feeder” specialty descriptions, consistent with the function and job performed. The table that follows identifies CEM codes and their titles and feeder specialties.

ATTACHMENT 6
AIR FORCE
AFSC CONVERTIBLE SKILLS LIST

These instructions establish the parameters for recruiting prior military service personnel with needed experience and training equivalent to an existing Air Force specialty. Prior service applicants, eligible for enlistment in the Air Force and possessing a convertible skill listed on the attached conversion list, may be awarded the 3-skill level AFSC provided the applicant meets the below eligibility criteria. Documentation of formal training completion is required.

1. Being listed as a convertible skill waives **only** the completion of the mandatory initial skills course(s); the 3-skill level awarding course listed in the appropriate specialty description attachment of the AF Enlisted Classification Directory (AFECD). All other mandatory entry requirements listed in the AFECD, including attachment 4 (except for ASVAB requirements), and upgrade requirements for the applicable AFSC apply.
2. Apply the guidance outlined in AFI 36-2101, *Classifying Military Personnel (Officer and Enlisted)*, chapter 4, table 4.1, Downgrade and Withdrawal of AFSC, to all branches of the service, including the Air Force, when determining individual's qualifications. If the individual's specialty should have been withdrawn as a result of non-duty performance in the specialty as outlined in AFI 36-2101, then follow the guidance further outlined in paragraph 4.1.2.3.4, to determine if the individual is qualified for enlistment using the convertible skills provision.
3. Individuals having a convertible skill listed for the AFSC requested and otherwise qualified for enlistment may be awarded the 3-skill level in the selected AFSC.
4. The Convertible Skills List is **only** for prior service personnel who enlist into the Air Force with prior military training and experience. Individuals **will not** be awarded a 3-skill level AFSC solely for future assignment consideration. AFSC awarded must be the individual's CAFSC, and the individual must be scheduled for assignment in the awarded AFSC.
5. The MOS, Rating, or Coast Guard identifier is convertible to the AFSC immediately to the right of each column only.
