## INTRODUCTION

This volume represents a composite listing of majors within degree programs offered by Kansas Regents institutions. It was reviewed by each of the institutions and may be regarded as a definitive list of authorized majors as of the fall semester, 2003.

The Degree and Certificate Program Inventory consists of two general parts: Part I lists programs by subject areas; Part II lists subject areas by institution. The subject area nomenclature and the taxonomic numerical codes are those used by the National Center for Education Statistics (NCES) and found in the Classification of Instructional Programs: 2000 Edition.

In most cases the title of the program in the Inventory is that preferred by the institution. In a few cases, programs similar in nature may be offered with different preferred titles and may have been grouped for ease of classification within this taxonomy. The Inventory does not identify or include "minors" or "areas of concentration" below the major level. Programs which meet certification requirements for teaching or other educational services are listed as teaching fields by institution although a major is not offered.

Only programs listed in the Inventory may be listed as majors or publicized as degree programs offered by the institution. Additions to the Inventory require approval through the regular Board of Regents procedure for approval of new programs. Official changes are a matter of public record in the Board Office and information about such changes is available on request between publications. The Inventory is intended for use by policy planners, the Kansas Board of Regents, the institutions within the Regents system and State agencies concerned with higher education.

## PROCEDURES, POLICIES, DEFINITIONS

The following policies and definitions were adopted as guidelines to be observed by each of the Regents institutions in compiling this inventory:

1. Only programs listed in the Degree Inventory may be listed as majors or publicized as degree programs offered by the institution.
2. The program classification code as used in the NCES document: Classification of Instructional Programs (CIP) shall be used as the basis of identifying degree and certificate programs at the Regents institutions.
3. Institutions shall report their degrees conferred each year on the Higher Education General Information Survey under the same codes as in the Degree and Certificate Program Inventory.
4. Institutions retain the choice of "major" nomenclature, but concurrence by the Board of Regents office must be obtained in the choice of the CIP code under which majors are listed.
5. Programs listed in the Inventory are subject to minimum degree productivity standards adopted by the Board of Regents.
6. Additions to the Inventory require approval through the regular Board procedures for approval of new programs.
