Electrical 1

Course Information

Developers: Automotive Technology State Curriculum Committee

Ron Kirmer, Barton Community College; Mary Foley, Barton Community College; Mark Jaye, Butler Community College; Michelle Ruder, Butler Community College; Jeff Phillips, Coffeyville Community College; Tim Walton, Cowley County Community College; Joe Clasen Cowley County Community College; Jeff Cole, Dodge City Community College; Stan Sanko, Dodge City Community College; Janet Hamilton, Hutchinson Community College; Tavis Lydic, Hutchinson Community College; Richard Fort, Johnson County Community College; JC James, Johnson County Community College; John Hattok, Kansas City Kansas Community College, Daryl Luca, Pratt Community College; Bret Popo, Flint Hills Technical College; Alex Anderson, Manhattan Area Technical College; Andy Duggan, Manhattan Area Technical College; Bob Gibbens, North Central Kansas Technical College; Mark Rathburn, North Central Kansas Technical College; Jennifer Brown, North Central Kansas Technical College; Tom Conway, Salina Area Technical College; Steven Helzer, Salina Area Technical College; Robert Arney, Washburn Institute of Technology; Robert Oswald, Washburn Institute of Technology; Gillian Gabelmann, Washburn Institute of Technology; Joe Smith, Wichita Area Technical College; David Young, Wichita Area Technical College; Mike Edwards, Wichita Area Technical College.

Development Date: 3/10/2014

KBOR Facilitators: Shirley Antes/ April Henry

Credit Hours: 3

Description:

In this course students will complete service work orders; describe the relationship between voltage, ohms and amperage; perform basic electrical circuit repairs; identify electrical system faults; identify basic wiring diagram symbols, components, and legend information; perform basic electrical circuit measurements using a DVOM; describe basic circuit characteristics of series, parallel and series parallel circuits through a variety of classroom and shop learning and assessment activities.

Competencies

A. General

1. Research applicable vehicle and service information, vehicle service history, service precautions, and technical service bulletins. P-1

2. Demonstrate knowledge of electrical/electronic series, parallel, and series-parallel circuits using principles of electricity (Ohm’s Law). P-1

3. Use wiring diagrams to trace electrical/electronic circuits. P-1
4. Demonstrate knowledge of the causes and effects from shorts, grounds, opens, and resistance problems in electrical/electronic circuits. P-1
5. Demonstrate knowledge of the causes and effects from shorts, grounds, opens, and resistance problems in electrical/electronic circuits. P-2
6. Check operation of electrical circuits with a test light. P-2
7. Check operation electrical of electrical circuits with fused jumper wires. P-2
8. Measure key-off batter drain (parasitic draw). P-1
9. Inspect and test Fusible links, circuit breakers, and fuses; determine necessary action. P-1
10. Perform solder repair of electrical wiring. P-1
11. Replace electrical connectors and terminal ends. P1-

B. Batter Service
1. Perform battery state-of-charge test; determine necessary action. P-1
2. Conform proper batter capacity for vehicle application; perform batter capacity test; determine necessary action. P-1
3. Maintain or restore electronic memory functions. P-1
4. Inspect and clean battery; fill battery cells; check battery cables, connectors, clamps, and hold-downs. P-1
5. Perform slow/fast battery charge according to manufacturer’s recommendations. P-1
6. Jump-start vehicle using jumper cables and a booster battery or an auxiliary power supply. P-1
