Suspension and Steering I

Course Information

Developers: Automotive Technology State Curriculum Committee

Ron Kirmer, Barton Community College; Mary Foley, Barton Community College; Mark Jaye, Butler Community College; Michelle Ruder, Butler Community College; Jeff Phillips, Coffeyville Community College; Tim Walton, Cowley County Community College; Joe Clasen Cowley County Community College; Jeff Cole, Dodge City Community College; Stan Sanko, Dodge City Community College; Janet Hamilton, Hutchinson Community College; Tavis Lydic, Hutchinson Community College; Richard Fort, Johnson County Community College; JC James, Johnson County Community College; John Hattok, Kansas City Kansas Community College, Daryl Luca, Pratt Community College; Bret Popo, Flint Hills Technical College; Alex Anderson, Manhattan Area Technical College; Andy Duggan, Manhattan Area Technical College; Bob Gibbens, North Central Kansas Technical College; Mark Rathburn, North Central Kansas Technical College; Jennifer Brown, North Central Kansas Technical College; Tom Conway, Salina Area Technical College; Steven Helzer, Salina Area Technical College; Robert Arney, Washburn Institute of Technology; Robert Oswald, Washburn Institute of Technology; Gillian Gabelmann, Washburn Institute of Technology; Joe Smith, Wichita Area Technical College; David Young, Wichita Area Technical College; Mike Edwards, Wichita Area Technical College.

Development Date: 3/10/2014

KBOR Facilitators: Shirley Antes/ April Henry

Credit Hours: 3

Description:

In this course students will: document fundamental suspension systems concern; perform fundamental diagnostics of steering systems; perform fundamental repairs of suspension systems.

Competencies:

A. General
1. Research applicable vehicle and service information, vehicle service history, service precautions, and technical service bulletins. P-1
2. Disable and enable supplemental restraint system (SRS). P-1

B. Related Suspension and Steering Service
1. Inspect rack and pinion steering gear inner tie rod ends (sockets) and bellows boots. P-1
2. Determine proper power steering fluid type; inspect fluid level and condition. P-1
3. Flush, fill, and bleed power steering system. P-2
4. Inspect for power steering fluid leakage; determine necessary action. P-1
5. Remove, inspect, replace, and adjust power steering pump drive belt. P-1
6. Inspect and replace power steering hoses and fittings. P-2
7. Inspect pitman arm, relay (centerlink/intermediate) rod, idler arm and mountings, and steering linkage damper. P-1
8. Inspect tie rod ends (sockets), tie rod sleeves, and clamps. P-1
9. Inspect upper and lower control arms, bushings, and shafts. P-1
10. Inspect and replace rebound and jounce bumpers. P-1
11. Inspect track bar, strut rods/radius arms, and related mounts and bushings. P-1
12. Inspect upper and lower ball joints (with or without wear indicators). P-1
13. Inspect suspension system cold springs and spring insulators (silencers). P-1
14. Inspect suspension system torsion bars and mounts. P-1
15. Inspect and replace front stabilizer bar (sway bar) bushings, brackets, and links. P-1
16. Inspect strut cartridge or assembly. P-1
17. Inspect front strut bearing and mount. P-1
18. Inspect rear suspension system lateral links/arms (track bars), control (trailing) arms. P-1
19. Inspect rear suspension system lead spring(s), spring insulators (silencers), shackles, brackets, bushings, center pins/bolts, and mounts. P-1
20. Inspect, remove, and replace shock absorbers; inspect mounts and bushings. P-1
21. Inspect electric power-assisted steering. P-3
22. Identify hybrid vehicle power steering system electrical circuits and safety precautions. P-2
23. Describe the function of the power steering pressure switch. P-3

C. Wheel Alignment
1. Perform prealignment inspection and measure vehicle ride height; determine necessary action. P-1

D. Wheels and Tires
1. Inspect tire condition; identify tire wear patterns; check for correct size and application (load and speed ratings) and adjust air pressure; determine necessary action. P-1
2. Rotate tires according to manufacturer’s recommendations. P-1
3. Dismount, inspect, and remount tire on wheel; balance wheel and tire assembly (static and dynamic). P-1
4. Dismount, inspect, and remount tire on wheel equipped with tire pressure monitoring system sensor. P-2
5. Inspect tire and wheel assembly for air loss; perform necessary action. P-1
6. Repair tire using internal patch. P-1
7. Identify and test tire pressure monitoring systems (indirect and direct) for operation; verify operation of instrument panel lamps. P-2
8. Demonstrate knowledge of steps required to remove and replace sensors in a tire pressure monitoring system. P-2
